

HYPERSENSPECTRAL LIGHTS

SWIR-LED Broadband technology

The hyperspectral SWIR LED line lights MTD-LED HSL/HSL2 offer a powerful and durable illumination solution for spectral imaging. In chip-on-board technology up to 14 different SWIR wavelengths are combined into a homogeneous broadband spectrum. The output power of each wavelength can be programmed separately. The irradiance levels are comparable to halogen lamps.

HYPERSPECTRAL

MTD-LED HSL SWIR

MTD-LED HSL is a compact and flexible hyperspectral illumination unit, which is available with different spectral variants in the range of 1000 – 1900 nm.

MTD-LED HSL- AC2

The light is available in lengths of 300 and 600 mm as standard. Working distance options include 150, 300 and 400 mm focus. Air-cooled and liquid-cooled versions are available.

SPECIAL FEATURES

- Broadband LED spectra in the range of 1000-1900 nm
- Extremely high intensity (800 W/m² at a distance of 400 mm)
- No significant heat emission
- Spectral independent focussing using reflector optics
- Air and liquid cooling with integrated temperature control
- Programmable spectral characteristics
- Red pilot LED to assist positioning

BEAM CHARACTERISTIC

FOCUSSING

	RF 150	RF 300	RF 400
Working distance [mm]	130-160	260-320	300-400
Line width FWHM [mm]	7	12	16
Relative Irradiance	200%	100%	75%
Application	Flat material	Objects of 2-4 cm	Objects of approx. 8 cm

Within the listed working distance ranges, the respective irradiance is almost constant.

ELECTRICAL DATA

Supply:	48VDC, up to 190 W per 300 mm depending on programming and spectral version
Connectors:	M16/ M23 power connector, M12 Dig I/O connector, M12 Ethernet socket

HYPER SPECTRAL II

MTD-LED HSL2-SWIR

The MTD-LED HSL2 line light has been developed especially for applications that require a long illumination length. The main area of application is currently optical sorting in the SWIR spectral range. Different spectral versions are available from 1000 – 1900 nm. An optimised reflector geometry with an enlarged aperture has increased the efficiency of the focusing optics by 25% with a line width of 14 mm.

MTD-LED HSL2

The light is available in lengths of up to 3 metres. The weight of the light source is only 10 kg/m and provides a working distance of 350 – 400 mm. The lights are temperature-controlled via liquid cooling.

SPECIAL FEATURES

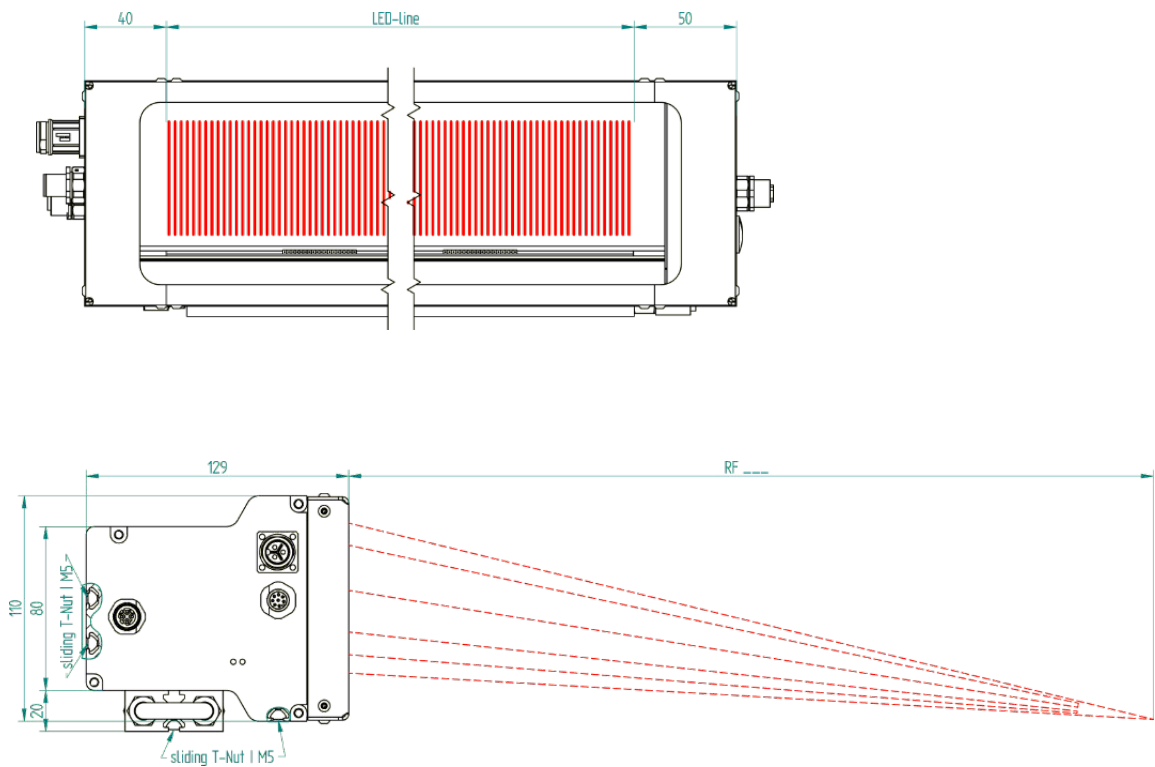

- Broadband LED spectra in the range of 1000-1900 nm
- Length up to 3m | Weight approx. 10 kg/m
- Optimised reflector optics with 25% increased efficiency
- No significant heat emission
- liquid cooling with integrated temperature control
- Programmable spectral characteristics
- Red pilot LED for light positioning

COOLING / TEMPERATURE CONTROL

MTD-LED HSL/HSL2

Hyperspectral lights must be operated with temperature control to stabilise the spectrum. For this purpose, a temperature sensor is integrated in the MTD-LED HSL/HSL2. The cooling rate can be adjusted continuously using the built-in PID controller. In the air-cooled version, the speed of the integrated fans is actively readjusted for this purpose.

MTD-LED HSL-AC2

In the liquid-cooled version, the temperature is adjusted by means of a flow regulator.

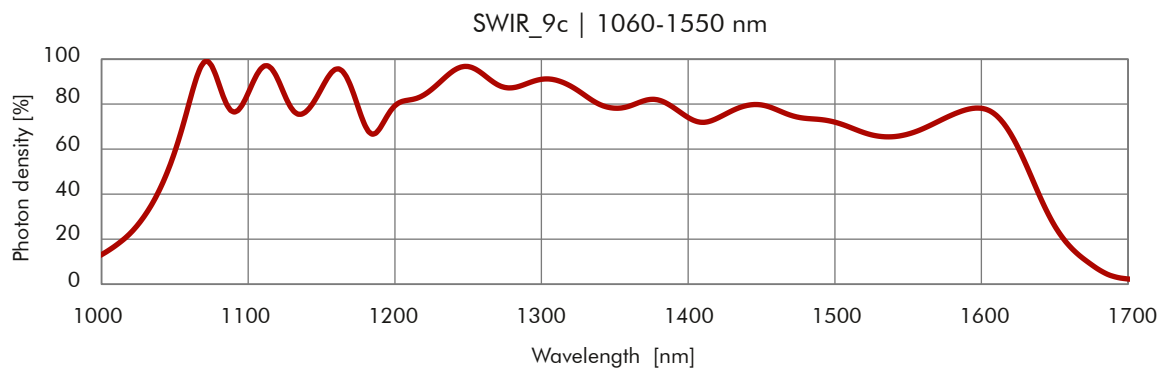

MTD-LED HSL2-LC

SPECTRA

MTD-LED HSL / HSL2

For the MTD-LED HSL/HSL2 line light, MTD offers the following spectra. In addition, customer-specific assembly variants with up to 14 different wavelengths are possible. Wavelength-specific power programming allows the spectrum to be adapted to different sensor characteristics.

TYPE CODE

MTD-LED HSL / HSL2

■ Type	HSL/HSL2	Hyperspectral line light with COB technology	
■ Length	HSL	...	Light field length: 300, 600 mm, Raster: 300 mm
	HSL2	...	Light field length: 300 - 3000 mm, Raster: 300 mm
■ Luminous colour	SWIR_2a	1100 – 1650 nm	
	SWIR_9c	1060 – 1550 nm	
	SWIR_13	1300 – 1900 nm	
	SWIR_x	Other wavelength combinations in the 980–1900 nm range available on request	
■ Optics	HSL	RF ...	Reflector optics with focus at
		... 150	150 mm distance
	HSL, HSL2	... 300	300 mm distance
		... 400	400 mm distance
■ Casing options for corrosive environments	V4A	Power connectors and screws in stainless steel V4A	
■ Protective glass	SG	Borofloat® 33 protective glass (standard)	
	SG_AR1	Protective glass with anti-reflex-coating (only up to 900 mm length)	
	SG_PC	Polycarbonate protective glass	
■ Communication	E	Ethernet interface (standard)	
	Ta	Optimised trigger, asynchronous, low active	
	Ts	Optimised trigger, synchronous, high active	
■ Temperature regulation	TC	Integrated temperature controller for controlling an actuator that regulates cooling (Standard)	
■ Alignment aid	PLED	Pilot LED to assist alignment (can be switched on and off)	
■ Power connector	M16s	M16 straight	M23s M23 straight
	M16r	M16 right-angled, rotatable	M23r M23 right-angled, rotatable
■ Cooling	AC2	Active air cooling via integrated long-life fans and dynamic speed control	
	LCC ...	Slim liquid cooling plate with stainless steel channels, screw-on groove, 48 mm wide	
	... sv ...	Rotated cooling plate, mounted below the LED strip	
	... G1/8	G1/8 connecting thread (for R1/8 fitting)	
	... K	Straight self-sealing couplings	
	... K6/8s	Straight self-sealing couplings and straight push-on fittings for 6/8 hose	

ORDER CODE

MTD-LED HSL2 300-SWIR_9c-RF400-SG-E-TC-PLED-M16r-LCCsvG1/8

Only the required options are listed in the order code.
